testimony on the Hill later this month. In general, the latest version not only chronicles the emergence of narcotics as a significant and difficult foreign intelligence problem, but also the report examines what lies ahead for the Intelligence Community as it attempts to grapple with the problem.

25X1 SOVIET BALLISTIC MISSILE DEFENSE: [REDACTED]

- The first meeting of the BMD Working Group to discuss the BMD follow-up report was held on 10 July. CIA, DIA, USAF, DOE, NSA, HUMINT Committee PBS and CIPC representatives were present. Army, SIGINT Committee and COMIREX representatives are expected to participate in the next scheduled meeting on 23 July. At the meeting, the group agreed on the procedures and schedule for producing the follow-up report--final draft is scheduled to be completed the week of 5 August 1985. In addition, the group received a briefing from COMIREX on BMD collection results.
- The Perry Panel report on BMD has been approved by DIRNSA and is expected to be forwarded to CIPC in a matter of days. It is essential that the BMD Working Group receive the Perry Panel report soon in order to keep our review on schedule.

25X1 MOBILE MISSILE STUDY: [REDACTED]

- [REDACTED] the primary representative from CIA called on Friday, 12 July, to inform us that through a procedural error, CIA's objections to the study had not been tabled at the 17 June CIPC meeting. He further stated that Bob Gates would be signing a paper containing those objections and that they would be forwarded to us. He was not aware of any inputs coming from [REDACTED] and this paper was not coordinated with Doug.
- [REDACTED] also stated that he had accepted a new position and will no longer be the primary CIA representative to the Mobile Missile Panel. There has not been a designated replacement.
- [REDACTED] attended a full session of the Defense Science Board on 11 July and heard three briefings.
